# School Directories
Terminal App

What this app can do

- In this project a user with admin privilege will have options:

  - To create lists or directories of anything and save it into a file

  - To view that list created

  - To visualize other lists,

  - add new record and delete a record or

  - To edit it.

Features used

- We used some gems

  - TTY – Prompt to help user navigate through Menu without any problem

Features used

- We used some gems

  - Colorize Gem to give different colors the outputs … We made Red Text when User make a mistake and input wrong data and we display titles in different colors

ec.rb
ec.rb⬚Zone.Identifier

PROBLEMS   OUTPUT   DEBUG CONSOLE   TERMINAL

```
CONTENTS OF A LIST

1: Math
2: Physics
3: Biology
4: Social
5: History
6: Geography

What do you want to do? Edit File Content
choose number from list
>
```

Features used

- We used some gems

  - TTY-Box Gem to give different tests our outputs especially on First Level of Headings

Challenges

- I had a lot of issues (Family / Personal) on last minutes and lost all control and needed time to compose my self and it's not easy but am glad that I submitted even though am 4 days late.

- I have a lot of confusion about terminology I must work on it I don't want to get lost next term.
